

Contents

I. Bulk Amorphous Materials

Solid State Amorphization by Cold-Rolling

H. Sieber, University of Erlangen-Nuremberg (D);

G. Wilde, J. H. Perepezko, University of Wisconsin-Madison (USA) 3

Optimization of ZrTiCuNiBe Metallic Bulk Glass Composition

M.-P. Macht, N. Wanderka, I. Sieber, Hahn-Meitner-Institut Berlin (D);

Q. Wei, Max-Planck-Institut für Mikrostrukturphysik Halle (D) 10

Oxide Formation on Zirconium-based Bulk Amorphous Alloys

T. Strunskus, H. Ladebusch, G. Hasse, F. Faupel, Technische Fakultät der CAU Kiel (D);

S. K. Sharma, Malaviya Regional Engineering College, Jaipur (IND) 16

Self-Diffusion in Bulk Metallic Glasses

K. Knorr, H. Mehrer, Institut für Metallforschung, Münster (D);

M.-P. Macht, Hahn-Meitner-Institut Berlin GmbH (D) 22

Diffusion Studies in Amorphous NiZrAl Alloys

S. Flege, H. Hahn, TU Darmstadt (D) 30

A Mechanical Spectroscopy Study of Zr-Based Bulk Metallic Glasses

R. Scarfone, H.-R. Sinning, Technical University, Braunschweig (D) 34

Quantitative Analysis of Fracture Surface Morphologies in a Zr-Ti-Ni-Cu-Be Bulk Metallic Glass

A. Taischl, R. Rippan, Austrian Academy of Sciences, Leoben (A);

C. J. Gilbert, V. Schroeder, R. O. Ritchie, University of California, Berkeley (USA) 40

Bulk Fe-Based Glassy Alloys Prepared by Casting and Powder Metallurgy

T. Mizushima, K. Ikarashi, S. Yoshida, Alps Electric Co., Ltd., Nagaoka (J);

A. Makino, Akita Prefectural Univ., Honjou (J);

A. Inoue, Tohoku Univ., Sendai (J) 46

The Obtaining of Metallic Amorphous Ribbons From Fe-Sm-B System and the Study of their Crystallization Mechanism

C. Munteanu, I. Rusu, M. D. Pelicuda, Technical University "Gh. Asachi" – Iasi (RO) 53

Relaxation Phenomena in the Al_{7.5}Cu_{17.5}Ni₁₀Zr₆₅ Bulk Metallic Glass Studied by Bend Stress and Anelastic Strain Relaxation under Isothermal and Non-Isothermal Conditions

K. Russev, Bulgarian Academy of Sciences, Sofia (BG);

F. Sommer, Max-Planck-Institut für Metallforschung, Stuttgart (D) 57

Viscosity and Thermal Expansion of the Al_{7.5}Cu_{17.5}Ni₁₀Zr₆₅ Bulk Metallic Glass

K. Russev, L. Stojanova, Bulgarian Academy of Sciences, Sofia (BG);

F. Sommer, Max-Planck-Institut für Metallforschung, Stuttgart (D) 65

Bulk Ferromagnetic Amorphous Alloys

<i>H. Chiriac, N. Lupu, National Institute of Research and Development for Technical Physics, Iasi (RO)</i>	71
---	----

II. Undercooling

Advances in Modeling of Crystal Nucleation from the Melt

<i>F. Spaepen, J. Fransaer, Harvard University, Cambridge MA (USA)</i>	79
--	----

Nucleation Kinetics Analysis by Repeated Solidification of Single-Droplets

<i>G. Wilde, Forschungszentrum Karlsruhe (D);</i> <i>J. Sebright, P. Höckel, J. H. Perepezko, University of Wisconsin-Madison (USA)</i>	85
--	----

Cluster-induced Nucleation of Undercooled $\text{Ge}_{73.7}\text{Ni}_{26.3}$ Alloy Melts

<i>R. P. Liu, Yanshan University, Qinhuangdao (VRC);</i> <i>W. K. Wang, Chinese Academy of Sciences, Beijing (VRC)</i>	92
---	----

Short-Range Order in Undercooled Melts and its Implication on the Nucleation of Solid Phases

<i>D. Holland-Moritz, Institut für Raumsimulation, DLR, Köln (D)</i>	98
--	----

Microstructure Evolution of Rapidly solidified Zn-Ag Peritectic Alloy

<i>C. D. Cao, J. Gao, B. Wei, Northwestern Polytechnical University, Xian (VRC)</i>	104
---	-----

Quantitative Studies on Dendritic Solidification

<i>E. Kaufmann, I. Stalder, J. H. Bilgram, ETH Zürich (CH)</i>	110
--	-----

Rapid Solidification of Undercooled Succinonitrile Melts Within Thin Capillary Tubes

<i>A. Ludwig, A. Schillings, P. R. Sahn, RWTH Aachen (D)</i>	117
--	-----

Custom-Made Dendrites? The Effect of Time-Periodic Forcing

<i>L. Gránásy, T. Tóth-Katona, Á. Buka, Research Institute for Solid State Physics and Optics, Budapest (H);</i> <i>T. Börzsönyi, Universités Paris VI et VII (F)</i>	123
--	-----

Deformation of Dendrites by Fluid Flow During Rapid Solidification

<i>A. M. Mullis, D. J. Walker, S. E. Battersby, R. F. Cochrane, University of Leeds (UK)</i>	130
--	-----

Development of an Electrostatic Levitator for Containerless Processing

<i>T. Meister, G. Lohoefer, DLR - Institute of Space Simulation, Koeln (D);</i> <i>H. Unbehauen, Ruhr-University Bochum (D)</i>	136
--	-----

Measurement of Thermo-Physical Properties of Undercooled Cu-Zr Melts Using an Electrostatic Levitator

<i>P. L. Ryder, M. Krause, University of Bremen (D)</i>	142
---	-----

Phase Selection in Undercooled Metallic Melts, Studied with Energy Dispersive X-Ray Diffraction <i>C. Notthoff, D. M. Herlach, Institut für Raumsimulation, DLR, Köln (D); H. Franz, HASYLAB at DESY, Hamburg (D); D. Holland-Moritz, Ruhr-Universität Bochum (D); W. Petry, TU München, Garching (D)</i>	148
Comparative Study of Metastable Phase Formation in Undercooled Fe-Cr-Ni Melts by Various Containerless Solidification Experiments <i>T. Volkman, D. M. Herlach, Institut für Raumsimulation, DLR, Köln (D); W. Löser, Institut für Metallische Werkstoffe, IFW, Dresden (D)</i>	154
Undercooling and Solidification of Fe-Si Alloys by Electromagnetic Levitation <i>R. P. Liu, T. Volkman, W. Bender, D. M. Herlach, DLR - German Aerospace Center, Koeln (D)</i>	161
Study of the As-Solidified Microstructures in Gas Atomized Al ₉₀ Fe ₅ Nd ₅ Powders <i>A. García Escorial, M. Lieblich, CENIM-CSIC, Madrid (E); K. R. Cardoso, W. J. Botta, Universidade Federale de São Carlos (BR)</i>	166
Undercooling and Crystal Growth Velocity During Rapid Solidification <i>C. Caesar, München (D)</i>	171
Mechanical Behavior of a Rapidly Solidified Ni ₈₀ B ₂₀ Amorphous Alloy <i>M. Eddahbi, Centro Nacional de Investigaciones Metalúrgicas, CSIC, Madrid (E); P. Pérez, Joint Research Centre of the European Commission, Ispra (I); F. Audebert, Universidad de Buenos Aires (RA)</i>	177
Phenomenon of Precipitation of Metal Being Electrodeposited, Occurring via Formation of an Undercooled Liquid Metal Phase and its Subsequent Solidification. Part 1. Experimental Detection and Theoretical Grounding <i>O. B. Girin, Ukrainian State University of Chemical Engineering, Dnipropetrovsk (UA)</i>	183
Phenomenon of Precipitation of Metal Being Electrodeposited, Occurring via Formation of an Undercooled Liquid Metal Phase and its Subsequent Solidification. Part 2. Experimental Verification <i>O. B. Girin, Ukrainian State University of Chemical Engineering, Dnipropetrovsk (UA)</i>	189
Density of Fe-B- and Co-B-Based Alloys in Liquid, Amorphous and Crystalline States <i>M. R. Filonov, O. A. Abdul-Fattakh, M. G. Taranov, S. V. Ivanov, Moscow Institute of Steel and Alloys (RUS)</i>	195

III. Powdermetallurgy

Structure Property Relationships of Porous Sintered Iron and Steel <i>M. Dalgic, P. Beiss, Aachen University of Technology (D)</i>	203
---	-----

Dynamic Properties of Pre-Alloyed Molybdenum Steel Powders for Gear Applications <i>G. Olschewski, QMP Metal Powders GmbH, Mönchengladbach (D)</i>	210
Sintered Steel Parts for Automobile Weight Reduction <i>G. Rau, M. Krehl (D)</i>	216
Liquid Phase Sintering of Steel Powder <i>L. Nyborg, W. Khraisat, Chalmers University of Technology, Göteborg (S)</i>	222
Reactive Sintering of 316L Stainless Steel by the Formation of a Nickel Aluminide Liquid Phase. <i>P. Jackson, C. C. Degnan, J. V. Wood, University of Nottingham (UK)</i>	229
Full Densification of the Injection Molded W-Ni-Fe Heavy Alloy with the Fe-Contained Binder System <i>Y. D. Kim, D.-G. Kim, I.-H. Moon, Hanyang University (Korea); J.-K. Lee, National Institute of Technology & Quality (Korea); E.-P. Kim, Agency for Defense Development (Korea)</i>	237
Numerical Modelling of Powder Metallurgy Processes <i>R. Baccino, L. Féderzoni, F. Moret, CEA/CEREM - 17, Grenoble Cedex (F)</i>	243
Fine Particle Atomization Technology <i>J. Hamill, C. Schade, Hoeganaes Corporation Cinnaminson, New Jersey (USA)</i>	251
Design and Powder Metallurgy Processing of Functionally Graded Materials <i>M. Gasik, Helsinki University of Technology (FIN); A. Kawasaki, Tohoku University, Sendai (J); S. Ueda, Osaka Institute of Technology, Osaka (J)</i>	258
Formation and Characteristics of Banded Microstructures in a Consolidated Al-Fe Based Alloy Obtained From Rapidly Solidified Powders <i>T. Grosdidier, Université de Metz (F); P. Keramidias, P. Tsakiropoulos, University of Surrey, Guildford (UK)</i>	265
The Mechanical Characteristics for Ferrous Sintering Alloys <i>I. Ciupitu, S. Sontea, M. Didu, University of Craiova (RO)</i>	271
The Aspects of the Modern Technology for the Obtaining of the Pseudoalloys WNiCu for Electrical Contacts <i>P. Ileana, D. Constantin, T. Daniela, University of Craiova (RO)</i>	276
The Structure and Properties of Powder Didymium-Iron-Boron Magnets <i>G. P. Brecharya, E. A. Vasilyeva, Y. G. Putilov, S. V. Ustinova, Zaporozhye State University (UA)</i>	281
Gas-Atomization Nd-Fe-B Powders for Permanent Magnets <i>G. P. Brecharya, E. A. Vasilyeva, N. F. Janchik, Zaporozhye State University (UA)</i>	287

Characterization of a Pre-Alloyed TiAl Powder after Densification by HIP and Extrusion <i>B. Préauchaat, F. Popoff, M. Thomas, Office National d'Etudes et Recherches Aérospatiales, Châtillon (F)</i>	292
Methods of Determining the Wearing Resistance of Non-ferrous Sintering Alloys <i>S. Gheorghe, S. Sontea, M. Didu, University of Craiova (RO)</i>	298
Some Particularity Concerning the Electric Arc Welding of the P/M Steel Pieces <i>G. Vaduvoiu, University of Craiova (RO)</i>	303
Dilatometry Behavior of Extruded Aluminium Alloy Reinforced with Carbides <i>L. E. G. Cambronero, E. M. Ruiz-Navas, J. M. Ruiz-Román, J. M. Ruiz-Prieto, Material Engineering Dept. School of Mines, UPM, Madrid (E)</i>	308
Radial Crushing Strength of Bronze with Nickel-Graphite Additions <i>L. E. G. Cambronero, P. Sanchez, J. Pous, Material Engineering Dept. School of Mines, UPM, Madrid (E) F. A. Corpas, Chemical Eng. and Materials Dept., E.U.P. Linares, Universidad de Jaen (E)</i>	315
Sintered Structural Low Alloyed Steels Particulate Reinforced by High Speed Steel <i>S. Domsa, R. Orban, M. Fodor, Technical University of Cluj-Napoca (RO)</i>	323
Studies Regarding the Obtaining of Sintered Porous Permeable Materials <i>L. Brabdusan, C. Pavel, R. Orban, R. Muresan, T. Dobra, Technical University of Cluj-Napoca (RO)</i>	329
Porous Electrodes Sinterised From Nickel Powder Made by Gas Reduction of the Nickel Oxides <i>E. Vasilescu, Dunarea de Jos" University Galati (RO); I. Vasilescu, SIDEX SA Galati (RO)</i>	334
Production of Cu-Zn-Al Shape Memory Alloys by Powder Metallurgy From Elemental Powders <i>A. F. Dericioglu, B. Ögel, S. Bor, Middle East Technical University, Ankara (TR)</i>	340
Microstructural Features of Titanium Alloys Manufactured by Blended Elemental Powder Metallurgy <i>O. M. Ivashishin, A. N. Demidik, D. G. Savvakin, Institute for Metal Physics, Kiev (RUS); V. M. Anokhin, State Research and Design Titanium Institute, Zaporozhye (RUS)</i>	345
Mechanically Processed Tungsten Powder for Activated Sintering <i>R. Muresan, V. Constantinescu, R. L. Orban, L. Brandusan, Technical University of Cluj-Napoca (RO)</i>	351
Aluminium Titanates Precursors Synthesis By A Novel Route (Precipitate Dissolved Air Flotation) <i>L. Stoica, Universita Politehnica Bucharest (RO); C. Plapcianu, M. I. Toacsan, A. Novac, National Institute of Materials Physics; Bucharest (RO); P. Nita, METAV S.A., Bucharest (RO)</i>	357

Morphology and Structure of some Soft Magnetic Powders Produced by a Two-Stage Quenching Technique

I. Chicina, N. Jumate, Technical University of Cluj-Napoca (RO);

T. Fărca, "Babe-Bolyai" University, Cluj-Napoca (RO)..... 363

Powder Metallurgy of Cu-Al-Ni Shape Memory Alloys for High Temperature Applications

J. San Juan, R. B. Pérez-Sáez, P. P. Rodríguez, M. L. Nó, Universidad del País Vasco, Bilbao (E);

V. Recarte, Universidad de Navarra, Pamplona (E)..... 369

Characterization of Microstructure of Sintered and Laser Remelted Composites

Z. Gácsi, J. Kovacs, A. Kovacs, M. Szigethy, University of Miskolc (H);

T. Pieczonka, University of Mining and Metallurgy, Krakow (PL);

G. Buza, Zoltan Bay Institute of Materials Science and Technology, Budapest (H)..... 375
